

Update Company Information

(Manage2 >> Company >> Update Company Information)

- [Overview](#)
- [Update your company's information](#)
- [Store Integration](#)
- [Purchase product URL](#)
- [Public profile information](#)

Overview

This interface allows you to view or update your company information.

Important:

For security purposes, cPanel, L.L.C. will only discuss account information with contacts that you enter in this interface. If you wish to allow additional people to receive company information or to make changes to your account, add their names and contact details.

Update your company's information

To update your company's information, modify the appropriate information and click *Save*.

Notes:

- You **cannot** update the *Company Name* and *DBA* sections. If you wish to update this information, click *Contact Us* at the top right corner of the interface to contact Customer Service.
- To add more than one name, email address, or phone number in a text box, separate them with commas.
- Use the *Company Domains* text box to list domains that will automatically receive enterprise-level support from cPanel, L.L.C. Add only the domains that are directly associated with your company. The tickets that you open from these domains will count toward your support usage.
- Manage2 links to our phone support system. This allows us to give your calls higher priority. Because of this, you **must** enter your *Contact Phone Number* in the following format:
 - US numbers: 1XXXXXXXXXX
 - Numbers outside of the US: +XXXXXXXXXXXX

Store Integration

The *cPanel Store Integration* options allow you to enable or disable the following items:

- Paid SSL certificates from the cPanel Store.
- Free hostname certificates from the cPanel Store.
- Free 90 day certificates from the cPanel Store.

To disable the *cPanel Store Integration* options, select the checkbox for the service that you wish to block and click *Save*.

Purchase product URL

cPanel & WHM can display the following product banners for purchase:

- CloudLinux™
- KernelCare
- LiteSpeed Web Server
- Imunity360
- WHMCS
- JetBackup
- cPanel License

To set a custom URL for a product purchase, enter your store URL in the appropriate text boxes and click *Save*.

For Developers

Content by label

There is no content with the specified labels

To disable a banner, select *Disable* and click *Save*.

Public profile information

Important:

This interface does **not** update your Partner NOC information. To update your Partner NOC information:

1. Navigate to the *Dashboard* interface.
2. Click *Profile*.
3. Select *Edit Partner NOC Profile*. A new browser tab will appear.
4. Click *Brands Dashboard*.

To add a logo, send a high resolution image of the logo to [Customer Service](#).

Notes:

- Vector (AI/EPS) graphics scale easily, but you can send any type of high resolution image file.
- Your logo **cannot** include banners, advertisements, or price information. We will **only** accept company logos.

Use the following format when you send your logo:

Subject: Company logo for cPanel Partner Search

Message Body:

Company Name

URL

Logo Graphic
